```java
package com.tnsif.packagesandaccessmodifiers;

import java.util.Scanner;

public class ScannerClassExample {

 public static void main(String[] args) {

   Scanner sc = new Scanner(System.in);

   System.out.println("Enter college name: ");
   String cname = sc.nextLine();

   System.out.println("Enter college code: ");
   int code = sc.nextInt();

   System.out.println("The college name is: " + cname + ",
The college code is: " + code);

 }

}
```
